

Part 1 — Siddhartha Educational Academy (SEAT) Student Admission Handbook

Institution Overview, Governance, Courses & Admissions (Detailed Version)

1. Institution Overview & Establishment

What is Siddhartha Educational Academy Group of Institutions (SEAT)?

Siddhartha Educational Academy Group of Institutions (commonly called **SEAT**) is a private professional educational institution located in **Tirupati, Andhra Pradesh**, established to provide education primarily in:

- Engineering
- Technology
- Management
- Physical Education

The institution mainly serves students from:

- Andhra Pradesh
- Telangana
- Rayalaseema region
- Nearby districts surrounding Tirupati

The college aims to combine:

1. **Academic education**
2. **Practical technical skills**
3. **Industry readiness**
4. **Professional ethics**
5. **Personality development**

Unlike institutions that focus only on classroom teaching, SEAT positions itself as a professional training-oriented college that attempts to improve employability through placements, training programs, technical chapters, and industry interaction.

Year of Establishment

Established in: 2009

This means the institution has been functioning for over **15 years**, which gives it moderate institutional maturity compared to newer colleges.

For a student, the establishment year matters because older colleges generally have:

Advantages

- More established academic systems
- Stronger alumni network
- Better placement history
- Mature examination systems
- Established recruiter relationships

Things students should still verify

Even older institutions vary in quality branch-wise. Students should verify:

- Department-wise placements
- Faculty quality
- Current infrastructure
- Lab quality
- Placement reality for their branch

rather than relying only on establishment year.

Founder & Institutional Background

Founder-Chairman

Sri Y. Konda Reddy

The institution was reportedly founded under the guidance of **Sri Y. Konda Reddy**, an educationist with more than **35 years of experience in education**.

Before establishing the engineering institution, he reportedly promoted educational institutions in programs such as:

- M.Sc.
- MCA
- MBA
- B.Ed.
- M.Ed.

This indicates that the educational society behind SEAT had prior experience in higher education before expanding into engineering and professional education.

Why Was the Institution Established?

SEAT was reportedly created to:

1. Improve access to technical education

Especially for students in:

- Tirupati region
 - Rayalaseema
 - Rural and semi-urban areas
-

2. Improve employability

The institution repeatedly emphasizes:

“industry readiness” and “employability enhancement.”

This means the college attempts to focus not only on academic subjects but also on:

- Placement preparation
 - Aptitude training
 - Communication skills
 - Industry interaction
-

3. Build professional and ethical graduates

The institution also highlights:

- Moral values
- Social ethics
- Leadership
- Community contribution

This becomes visible through:

- NSS activities
- Student welfare committees
- Professional chapters
- Personality development programs

2. Location & Campus Context

Campus Location

The institution is located at:

Gollapalli Road, Chintagunta Village, Tirupati (Rural), Andhra Pradesh – 517505

Nearby landmark:

Near C. Gollapalli

What this means for students

Because the institution is located near Tirupati:

Advantages

- Lower living costs than metro cities
- Easier transport access for nearby districts
- Educational ecosystem around Tirupati
- Reduced hostel/living expenses compared to Bengaluru/Hyderabad

Things students should verify

Before admission, students should check:

- Distance from city center
- Bus availability
- Daily transport convenience
- Internet availability in hostel
- Nearby rental rooms/PGs

This especially matters for day scholars.

3. Affiliations, Recognition & Regulatory Approvals

This is one of the most important sections for new students.

Many students misunderstand what approvals actually mean.

A. University Affiliation

SEAT is affiliated with:

Jawaharlal Nehru Technological University Anantapur

What does “affiliated” mean?

An affiliated college follows:

- University regulations
- Academic framework
- Curriculum structure
- Examination standards

In practical terms, this affects:

Academics

Students study syllabus approved under university/academic regulations.

Degree Validity

Degree recognition becomes important for:

- Jobs
- Higher studies
- Government exams
- Foreign education

B. AICTE Approval

SEAT is approved by:

All India Council for Technical Education

Why AICTE approval matters

AICTE approval is extremely important for:

Engineering validity

B.Tech/M.Tech programs should have AICTE approval.

Placement eligibility

Some companies prefer or require AICTE-approved institutions.

Government opportunities

It may affect:

- Scholarships
- Competitive exam eligibility
- Public sector applications

Higher studies

Approval matters during:

- GATE
 - MBA admissions
 - Foreign transcript evaluation
-

C. Physical Education Affiliation

The Physical Education division reportedly functions under:

Sri Venkateswara University

Approved by:

National Council for Teacher Education

This is important specifically for:

- B.P.Ed
- D.P.Ed
- M.P.Ed students

because teacher education programs follow different approval structures than engineering.

4. Vision, Mission & Institutional Philosophy

Understanding a college's vision helps students understand institutional priorities.

Institutional Vision

The institution aims to become:

An advanced centre of professional learning of international standing.

Practical meaning for students

The college attempts to focus on:

- Professional education
- Industry readiness
- Technical skill development
- Employability

rather than purely theoretical education.

Institutional Mission

The mission reportedly focuses on:

Academic excellence

Providing strong technical education.

Employability

Helping students become industry-ready.

Innovation

Supporting technical and research activities.

Ethical values

Creating socially responsible professionals.

Leadership development

Helping students become decision-makers and leaders.

5. Governance & Administration (Detailed)

Many students ignore governance, but it affects:

- Academic quality
 - Examinations
 - Discipline
 - Student grievance resolution
 - Curriculum implementation
-

A. Governing Body

The Governing Body is the **highest policy-level authority**.

Responsibilities

- Long-term institutional planning
- Strategic decisions
- Policy approvals
- Institutional direction

Examples:

- New programs
 - Infrastructure expansion
 - Academic policy decisions
-

B. Academic Council

The Academic Council is one of the most important student-facing bodies.

Responsibilities

1. Academic regulations

Decides:

- Academic policies
- Credit structure
- Curriculum implementation

2. Examination system

Influences:

- Academic regulations (R25 etc.)
- Examination rules
- Evaluation process

3. Academic quality

Monitors:

- Teaching quality
- Curriculum standards
- Academic performance

For students, this body indirectly affects:

- Subject structure
- Semester pattern
- Academic progression

C. Finance Committee

Responsible for:

- Budget allocation
- Institutional spending
- Financial planning
- Resource utilization

This affects:

- Infrastructure development
- Labs
- Facilities
- Equipment

D. Principal & Administrative Leadership

Principal

Dr. K. Rajasekhar (M.E., Ph.D.)

The principal generally oversees:

- Academic administration
- Faculty coordination
- Discipline
- Institutional execution

6. Courses & Departments (Detailed Student Guide)

This section is extremely important because many students choose branches based only on:

- Friends' suggestions
- Social media hype
- "CSE has placements" statements
- Family pressure
- Temporary trends

Instead, students should understand:

What will I study for 4 years?

Can I realistically enjoy this branch?

What jobs will I get?

What is the placement reality?

Will I regret this branch later?

At SEAT, B.Tech programs are available in:

1. Computer Science Engineering (CSE)
2. CSE – Artificial Intelligence (AI)
3. CSE – Artificial Intelligence & Machine Learning (AI&ML)
4. CSE – Data Science
5. Electronics & Communication Engineering (ECE)
6. Electrical & Electronics Engineering (EEE)
7. Mechanical Engineering
8. Civil Engineering

6.1 Computer Science & Engineering (CSE)

What is CSE?

Computer Science Engineering focuses on:

How software systems are built, how computers process information, and how technology products are developed.

If you use:

- Apps
- Websites
- AI tools
- Mobile applications
- Banking software
- E-commerce systems

CSE teaches the engineering behind them.

What Students Usually Study

Although syllabus changes over time, CSE students generally study:

Programming Languages

You may learn:

- C
- C++
- Java
- Python
- JavaScript (sometimes)

Purpose:

To build software and solve problems.

Data Structures & Algorithms

One of the most important subjects.

Students learn:

- Arrays
- Linked Lists
- Trees

- Graphs
- Searching
- Sorting
- Problem solving

Why this matters

This subject heavily affects:

- Software placements
 - Coding interviews
 - Product company jobs
-

Database Management Systems (DBMS)

Students learn:

- SQL
- Database design
- Data storage
- Query optimization

Used in:

- Banking systems
 - ERP systems
 - Web applications
-

Operating Systems

Students learn:

How systems like:

- Windows
- Linux
- Android

work internally.

Topics include:

- Memory management
- Processes
- CPU scheduling
- Threads

Computer Networks

Students learn:

How computers communicate through:

- Internet
- LAN
- Cloud systems

Topics:

- TCP/IP
 - Routing
 - Network security
-

Web Technologies

Students may learn:

Frontend:

- HTML
- CSS
- JavaScript

Backend concepts:

- APIs
 - Databases
 - Server logic
-

Software Engineering

Students learn:

How large software projects are developed professionally.

Topics:

- Requirement gathering
- Design
- Testing
- Maintenance

Emerging Technologies

Depending on curriculum updates:

Students may get exposure to:

- AI basics
 - Cloud computing
 - Cybersecurity
 - Data science
 - Machine learning
-

Who Should Choose CSE?

Choose CSE if:

- ✓ You enjoy technology
- ✓ You are comfortable learning continuously
- ✓ You like problem-solving
- ✓ You can sit for long hours coding
- ✓ You want flexibility in career options

You do **NOT** need to already know programming.

Many successful students start coding only after joining college.

Avoid CSE If

You strongly dislike:

- ✗ Computers
- ✗ Problem solving
- ✗ Continuous learning

Technology changes rapidly.

Students who stop learning after classroom teaching often struggle during placements.

Career Opportunities After CSE

Software Development

Roles:

- Software Engineer
 - Backend Developer
 - Frontend Developer
 - Full Stack Developer
-

Web Development

Build:

- Websites
 - Portals
 - SaaS products
-

Cloud & DevOps

Work with:

- AWS
 - Azure
 - Deployment systems
-

Data & Analytics

Roles:

- Data Analyst
 - BI Developer
-

Cybersecurity

Roles:

- Security Analyst
 - Network Security Engineer
-

Testing & QA

Roles:

- Software Tester
 - QA Engineer
-

AI & ML

Possible with extra learning.

Placement Reality of CSE

Biggest Advantage

CSE generally has:

Highest number of placement opportunities

because software companies recruit in large numbers.

Common recruiters in engineering colleges include:

- IT service companies
 - Product startups
 - Software consultancies
-

Important Reality

Simply joining CSE **does NOT guarantee placement**.

Students usually need:

1. Programming Skills

Especially:

- DSA
- Coding practice

2. Projects

Good portfolio helps.

3. Aptitude Preparation

4. Communication Skills

5. Internship Experience

Students depending only on syllabus often struggle.

Higher Education Options

After CSE:

M.Tech

Through GATE.

MBA

For management career.

MS Abroad

Popular path.

Certifications

Examples:

- Cloud
 - Cybersecurity
 - Data engineering
-

Common Misconceptions

Myth:

“CSE means only coding.”

Reality:

CSE includes:

- Networks
 - Databases
 - Security
 - Cloud
 - AI
 - Systems
-

Myth:

“Only toppers survive.”

Reality:

Consistent practice matters more than intelligence.

Recommendation for Students

Choose CSE if:

You want maximum career flexibility and are comfortable learning technology continuously.

6.2 CSE – Artificial Intelligence (AI)

What is AI Branch?

AI branch focuses on:

Building systems that imitate intelligent behavior.

Examples:

- ChatGPT
- Recommendation systems
- Image recognition
- Smart assistants

Students usually learn:

Core CSE Subjects

PLUS

AI-specific subjects:

- Machine Learning
 - Neural Networks
 - NLP basics
 - Computer Vision
 - Intelligent Systems
-

Who Should Choose AI?

Choose if:

- ✓ Strong interest in AI
 - ✓ Comfortable with math
 - ✓ Interested in future tech
-

Reality Check

AI jobs usually require:

- Strong coding
- Math
- Higher specialization

Many entry-level jobs still recruit general software engineers.

This is why:

Strong CSE fundamentals remain extremely important.

Career Options

- AI Engineer
- ML Engineer
- Data Scientist

- Software Developer
-

Common Misconception

✗ “AI branch automatically guarantees AI jobs”

✓ Reality:

Students still need:

- Skills
 - Projects
 - Strong fundamentals
-

6.3 CSE – Artificial Intelligence & Machine Learning (AI&ML)

This branch combines:

Computer Science

-

AI

-

Machine Learning

Students study:

- Programming
 - Data structures
 - Statistics
 - ML algorithms
 - Deep learning basics
-

Good For Students Who

- ✓ Enjoy math
 - ✓ Like analytics
 - ✓ Interested in intelligent systems
-

Placement Reality

Most students still compete for:

- Software jobs
- Developer roles

rather than pure ML jobs initially.

Recommendation

If confused between:

CSE vs AI&ML

Generally:

Choose CSE for flexibility

Choose AI&ML only if:

You are genuinely interested in AI.

6.4 CSE – Data Science

Focus:

Extracting insights from data.

Students study:

- Statistics
- Data analysis
- Python
- Machine learning
- Visualization

Career Opportunities

- Data Analyst
 - Data Engineer
 - BI Analyst
-

Important Reality

Most fresher roles are still software-oriented.

Advanced data science jobs often require:

- Strong statistics
- Experience
- Higher studies

Great. Continuing with the remaining academic programs and then the **most important section for new students: Branch Selection Guide**.

6.9 MBA Program (Master of Business Administration)

What is MBA?

The **MBA (Master of Business Administration)** program focuses on:

Management, business operations, leadership, finance, marketing, and organizational decision-making.

Unlike engineering, MBA prepares students for:

- Management roles
- Business operations
- Corporate leadership
- Entrepreneurship

At SEAT, MBA is offered as a **postgraduate program**, meaning students join **after completing a bachelor's degree**.

Who Can Join MBA?

Eligibility

Student must have:

- A **Bachelor's degree (3 or 4 years)**

Minimum marks:

- **50% marks**
- **45% for eligible reserved categories**

Entrance Exam

Admission generally happens through:

AP ICET

What MBA Students Study

MBA is usually divided into business-oriented areas.

1. Marketing

Students learn:

- Branding
- Advertising
- Sales strategy
- Consumer behavior

Good for students interested in:

- Sales
 - Marketing careers
 - Business growth
-

2. Finance

Students study:

- Accounting
- Investments
- Banking
- Financial analysis

Good for students interested in:

- Banking
 - Financial services
 - Corporate finance
-

3. Human Resource Management (HR)

Students learn:

- Recruitment
- Employee management
- Organizational behavior

Suitable for:

- People-oriented students
-

4. Operations Management

Focuses on:

- Business efficiency
 - Supply chains
 - Operational planning
-

Career Opportunities After MBA

Students may enter:

Corporate Roles

- HR Executive
 - Marketing Executive
 - Business Analyst
 - Operations Executive
-

Banking Sector

Finance specialization may support:

- Banking careers
 - Financial institutions
-

Entrepreneurship

MBA can help students planning to:

Start businesses.

Placement Reality

Important reality:

MBA outcomes often depend heavily on:

Communication Skills

Very important.

Personality

Confidence matters.

Networking

Professional interaction helps.

Internships

Experience becomes valuable.

Recommendation

Choose MBA if:

- ✓ Interested in business
- ✓ Enjoy communication
- ✓ Want management-oriented careers

Avoid MBA if:

- ✗ Doing it only because “I don’t know what to do.”
-

6.10 M.Tech Programs

What is M.Tech?

M.Tech (Master of Technology) is a postgraduate engineering degree.

It focuses on:

Technical specialization and advanced engineering knowledge.

Eligibility

Students generally need:

- B.E./B.Tech degree
- Relevant specialization

Minimum marks:

- **50%**
- **45% for eligible categories**

Entrance Exam

Admission typically through:

AP PGECET

M.Tech Programs at SEAT

1. Computer Science Engineering (CSE)

Suitable for students wanting deeper knowledge in:

- Programming
- Systems

- Software technologies

Career options:

- Senior technical roles
 - Teaching
 - Research
-

2. Embedded Systems

Focus:

Hardware + software integration.

Applications:

- IoT
 - Automotive electronics
 - Smart devices
-

3. Digital Electronics & Communication Systems (DECS)

Advanced study in:

- Communication systems
 - Electronics
 - Signal processing
-

4. Structural Engineering

Advanced civil engineering specialization.

Focus:

- Structural analysis
 - Building design
 - Construction systems
-

Who Should Choose M.Tech?

Good option for students who want:

- ✓ Specialization
 - ✓ Teaching career
 - ✓ Research
 - ✓ PSU/GATE route
-

Important Reality

M.Tech is usually most valuable when:

- Done from strong institutions OR
- Combined with specialization goals

Students should avoid joining M.Tech only because:

“I don’t have a job yet.”

without clear purpose.

6.11 Physical Education Programs

SEAT reportedly also supports a **Physical Education college**.

Programs include:

- B.P.Ed
 - D.P.Ed
 - M.P.Ed
-

B.P.Ed (Bachelor of Physical Education)

Suitable for students interested in:

- Sports education
- Physical training
- Fitness instruction

Career Opportunities

- Physical education teacher
- Sports trainer
- Fitness instructor

D.P.Ed (Diploma in Physical Education)

Focused on:

Basic physical education training.

M.P.Ed (Master of Physical Education)

Advanced program for:

- Higher teaching
 - Sports administration
 - Academic roles
-

Counselling Codes

SEAP → B.P.Ed

SPED → M.P.Ed

Approval & Affiliation

Approved by:

National Council for Teacher Education

Affiliated with:

Sri Venkateswara University

6.12 Branch Selection Guide (Very Important)

This is one of the most important decisions for students.

Do **not** choose branch only based on:

- ✗ Friend suggestion
 - ✗ Temporary trends
 - ✗ “Everyone is taking CSE”
 - ✗ Family pressure only
-

Case 1: “I Like Coding & Technology”

Recommended:

1. **CSE**
2. **AI**
3. **AI&ML**
4. **Data Science**

Best default option:

CSE

Why?

Because CSE gives:

- Broader flexibility
 - Wider job options
 - Strong software foundation
-

Case 2: “I Like Technology But Not Pure Coding”

Recommended:

ECE

Why?

Because ECE gives flexibility into:

- Electronics
 - Embedded systems
 - Software jobs
-

Case 3: “I Want Government Jobs”

Recommended:

EEE

Good for:

- Electrical boards
- PSU opportunities

Civil

Good for:

- Government engineering roles
 - Infrastructure jobs
-

Case 4: “I Love Machines & Automobiles”

Recommended:

Mechanical Engineering

Only if genuine interest exists.

Case 5: “I Don’t Know What to Choose”

General recommendation order:

Strong placement-oriented path

1. CSE
2. AI&ML
3. AI
4. Data Science
5. ECE

But:

Interest matters more than hype.

A highly skilled ECE student may outperform an uninterested CSE student.

CSE vs AI vs AI&ML vs Data Science

CSE

Best for flexibility

Choose if unsure.

AI

More specialization.

Choose if strong AI interest.

AI&ML

Balanced AI specialization.

Good if genuinely interested.

Data Science

Good for analytics-oriented students.

But advanced roles often need deeper specialization.

Final Recommendation for Students

If confused:

Choose branch based on long-term interest + placement opportunity + willingness to learn.

Do not ask:

“Which branch is easiest?”

Ask:

“Which branch can I stay motivated to learn for 4 years?”

7. Complete Admission Guide (Detailed Student & Parent Handbook)

This section is designed for:

- Students seeking admission
- Parents making decisions
- Counsellors guiding students
- Students comparing colleges/branches

The goal is to answer:

“How does admission to SEAT actually work?”

without ambiguity.

7.1 Understanding How Admissions Happen at SEAT

Admission into SEAT generally happens through **state-level entrance examinations** conducted in Andhra Pradesh.

The admission process differs based on the course.

Program	Admission Route
B.Tech	AP EAPCET (formerly EAMCET)
M.Tech	AP PGECET
MBA	AP ICET
Physical Education	Separate counselling process

7.2 B.Tech Admission Process (Step-by-Step)

For most engineering students, admission happens through:

AP EAPCET

(formerly called AP EAMCET)

Step 1: Complete Intermediate (10+2)

Student should complete:

MPC Stream

Typically:

- Mathematics
- Physics
- Chemistry

OR

Diploma Route

Engineering diploma students may apply through lateral entry pathways.

Step 2: Write AP EAPCET Exam

Students write the state entrance exam.

Purpose of the Exam

The rank determines:

- Which colleges you may get
 - Which branch you may get
 - Counselling opportunities
-

Step 3: Rank Generation

Students receive:

Rank Card

Your rank affects:

- Branch availability
 - College options
 - Counselling probability
-

Step 4: Counselling Registration

Students participate in:

AP EAPCET Counselling

Usually includes:

1. Registration
 2. Fee payment
 3. Certificate verification
 4. Web option entry
 5. Seat allotment
-

Step 5: Certificate Verification

Students verify documents.

Typical verification may include:

- Educational documents
- Identity proof
- Reservation certificates
- Income documents

This stage is important for:

Scholarships

Reservation benefits

Fee reimbursement

Step 6: Web Options Entry

This is one of the most important stages.

Students choose:

College Preference

Example:

- College A
- College B
- SEAT

Branch Preference

Example:

- CSE
 - AI&ML
 - ECE
 - EEE
-

Common Student Mistake

Many students:

Randomly choose options.

Instead:

Students should prioritize:

- 1. Branch interest**
 - 2. Placement opportunity**
 - 3. Distance from home**
 - 4. Financial affordability**
 - 5. College quality**
-

Step 7: Seat Allotment

After counselling:

Students may receive:

Seat Allotment Letter

This indicates:

- College allotted
 - Branch allotted
 - Reporting timeline
-

Step 8: Report to College

Student reports to institution.

Usually includes:

- Admission confirmation
- Fee payment
- Document submission

Missing deadlines can sometimes affect admission.

7.3 Convener Quota vs Management Quota

Students and parents often get confused here.

A. Convener Quota

This is:

Government counselling-based admission.

Student gets seat through:

AP EAPCET counselling.

Advantages

Usually lower fee burden.

May support:

- Fee reimbursement
 - Government benefits
-

B. Management Quota

Students may join directly through college admission process.

Usually chosen when:

Situation 1

Student missed counselling.

Situation 2

Student wants specific branch.

Situation 3

Rank insufficient for preferred branch.

Important Advice

Before taking management admission:

Always verify:

- ✓ Fee structure
- ✓ Refund rules
- ✓ Branch availability
- ✓ Scholarship eligibility
- ✓ Placement support for branch

Never assume:

Management quota means guaranteed better experience.

Academics generally remain same after admission.

7.4 Eligibility Criteria (Detailed)

B.Tech Eligibility

Student should:

Educational Qualification

Pass:

- Intermediate (10+2)

OR

- Diploma
-

Age Requirement

Student should generally be:

16 years old before Dec 31 of admission year

State Eligibility

Typically follows:

AP/Telangana eligibility norms.

Practical Example

Eligible Case

Student completed:

Intermediate MPC with pass marks

and wrote AP EAPCET.

→ Eligible.

Diploma Student

Student completed:

Polytechnic diploma

→ May enter through lateral pathways.

7.5 B.Tech Branch Cutoffs Explained

Previous-year cutoffs help students estimate chances.

Reported 2024 Round-1 Benchmarks

Branch	Approx Rank
CSE	114,109
EEE	126,793
ECE	135,664
Mechanical	142,900
AI	145,728
Civil	152,607
AI & ML	171,045

Important: How to Interpret Cutoffs

Students misunderstand cutoff data.

Wrong Thinking

“2024 cutoff is 1.14 lakh, so I’ll definitely get seat.”

Not always true.

Why Cutoffs Change

Cutoffs may vary due to:

1. Student demand

Popular branches close earlier.

2. Difficulty of exam

Rank distribution changes yearly.

3. Seat availability

Branch intake affects cutoff.

4. Counselling rounds

Round 1 and final rounds may differ.

Practical Rule

If your rank is:

Better than previous cutoff

Higher probability.

Slightly below cutoff

Still possible.

Much lower than cutoff

Less predictable.

Alternative branch planning recommended.

7.6 MBA Admission Process

MBA admissions generally happen through:

AP ICET

Eligibility

Student should have:

Bachelor Degree

(3 or 4 years)

Minimum marks:

- 50%
 - 45% for eligible reserved categories
-

Important Restriction

Distance education degree should be recognized by:

- UGC
 - AICTE
 - DEC/DEB
-

Admission Process

Generally:

1. Write AP ICET
 2. Obtain rank
 3. Participate in counselling
 4. Choose college options
 5. Seat allotment
-

7.7 M.Tech Admission Process

Admission generally through:

AP PGECET

Eligibility

Student should have:

B.E./B.Tech

in relevant specialization.

Minimum marks:

- 50%
- 45% for eligible categories

Example

CSE Graduate

May apply for:

- M.Tech CSE

Civil Graduate

May apply for:

- Structural Engineering

(depending on eligibility norms)

7.8 Lateral Entry Admissions

Diploma students may enter:

Directly into 2nd year of B.Tech

(through applicable state counselling process)

This saves:

1 year of study

Students should verify:

- Seat availability
 - Branch mapping
 - Counselling rules
-

7.9 Documents Required During Admission

Students should prepare:

Academic Documents

- ✓ SSC/10th memo
 - ✓ Intermediate marks memo
 - ✓ Diploma certificates (if applicable)
 - ✓ Transfer Certificate (TC)
-

Entrance Documents

- ✓ Rank card
 - ✓ Hall ticket
-

Identity Documents

- ✓ Aadhaar card
 - ✓ Passport-size photographs
-

Reservation / Scholarship Documents

(If applicable)

- ✓ Caste certificate
- ✓ Income certificate
- ✓ Residence certificate

Other Helpful Documents

- ✓ Bonafide certificates
 - ✓ Study certificates
-

Parent Advice

Keep:

Multiple photocopies + scanned soft copies

This avoids last-minute problems.

7.10 Common Admission Mistakes Students Make

Mistake 1

Choosing branch only for trend.

Example:

“Everyone says AI is future.”

Without genuine interest.

Mistake 2

Ignoring placement reality.

Students should ask:

“How many students from THIS branch got placed?”

not:

“What is highest package?”

Mistake 3

Not verifying hostel.

Parents should physically inspect.

Mistake 4

Blindly trusting marketing brochures.

Always verify through:

- Seniors
 - Alumni
 - Department visits
-

Mistake 5

Ignoring financial planning.

Students forget:

- Hostel fee
- Transport
- Exam fees
- Daily expenses

7.11 Scholarships, Fee Reimbursement & Financial Planning (Detailed)

This section is very important because many students and parents underestimate the total cost of education.

Students often ask:

“Will my tuition be reimbursed?”

“What scholarship can I get?”

“How much money should we realistically plan for?”

“Will hostel fee also be covered?”

The answers depend on:

- Admission category
 - Government eligibility
 - Income criteria
 - Reservation category
 - Scholarship scheme rules for that year
-

A. Scholarships at SEAT — What Is Known

Based on available information, students at SEAT reportedly benefit from:

Government Scholarships

and

Fee reimbursement support for eligible students.

The institution also reportedly supports:

Category-based fee benefits

for eligible students according to government norms.

However:

Exact scholarship schemes and updated eligibility rules should always be verified with the college admission office and official government portals for the current academic year.

Rules can change yearly.

B. Fee Reimbursement (Important for AP Students)

Many Andhra Pradesh students may qualify for:

Government tuition fee reimbursement schemes

depending on eligibility.

What Fee Reimbursement Usually Means

In simple terms:

The government may pay:

Full or partial tuition fee

for eligible students.

This can significantly reduce financial burden.

Who Usually Becomes Eligible?

Eligibility generally depends on:

1. Family Income

Income certificate becomes important.

2. Reservation Category

Examples may include:

- SC
- ST
- BC
- Minority
- EWS categories

(subject to government rules)

3. Admission Status

Government counselling admissions often integrate more easily with reimbursement pathways.

Management admissions may require additional verification.

4. Academic Eligibility

Students may need to:

- Maintain attendance
 - Continue academic progression
 - Follow scholarship rules
-

Important Practical Advice

Never assume:

“Scholarship will definitely come.”

Instead:

Before admission, ask:

Questions to Verify

- ✓ Am I eligible for reimbursement?
 - ✓ What exact amount may be covered?
 - ✓ Is hostel fee covered?
 - ✓ Is transport fee covered?
 - ✓ Are there income limits?
 - ✓ Does management quota affect reimbursement?
-

C. Documents Usually Needed for Scholarships

Students should keep these ready.

Identity Documents

- ✓ Aadhaar card
-

Academic Documents

- ✓ 10th memo
 - ✓ Intermediate memo
 - ✓ Rank card
-

Financial Documents

- ✓ Income certificate

This is one of the most important documents.

Reservation Documents

(If applicable)

- ✓ Caste certificate
-

Residence Verification

- ✓ Residence certificate
-

Banking Details

Some schemes may require:

- ✓ Student bank account
-

Parent Advice

Do not delay:

Income certificate renewal

Many students face scholarship delays because:

- Certificates expire
 - Documents mismatch
 - Aadhaar linkage issues
-

D. What Costs Students & Parents Should Actually Plan For

Many families only think about:

Tuition fee

But total education cost includes more.

1. Tuition Fee

This is the main academic fee.

Important Note

Exact tuition fee details for SEAT were not available in verified information and must be directly confirmed from the college.

Students should verify:

- ✓ Convener quota fee
- ✓ Management quota fee
- ✓ Branch-wise fee difference
- ✓ Refund policy

before paying.

2. Hostel Fee

Hostel cost is usually separate.

Students should verify:

- ✓ Accommodation charges
- ✓ Mess fee
- ✓ Security deposit

- ✓ Laundry availability
 - ✓ Internet/Wi-Fi availability
-

Important Reality

Some students mistakenly assume:

“Scholarship covers everything.”

Usually not always.

Hostel and personal expenses may remain separate.

3. Transport Fee

For day scholars:

Bus facility may involve separate charges.

SEAT reportedly operates buses from:

- Tirupati
- Srikalahasti areas

Students should verify:

- ✓ Route availability
 - ✓ Pickup points
 - ✓ Annual transport fee
-

4. Examination Fee

Students often forget this.

Examination-related charges may include:

- Semester exam fee
 - Supplementary fee
 - Revaluation fee
 - Recounting fee
-

5. Study Materials & Personal Costs

Students may spend on:

- Notebooks
- Lab records
- Books
- Laptop
- Internet
- Certification courses

Especially for:

CSE / AI / Data Science students

A laptop becomes highly useful.

E. Financial Planning Advice for Parents

Instead of asking:

“Can we somehow manage first-year fee?”

Plan for:

Complete 4-year cost

Include:

Academic costs

-

Hostel/transport

-

Daily expenses

-

Emergency spending

Practical Parent Checklist Before Paying Fees

Ask the admission office:

Fees

- ✓ What is the exact fee structure?
 - ✓ Are there additional charges?
 - ✓ Is fee refundable?
-

Scholarship

- ✓ What reimbursement schemes apply?
 - ✓ Will management quota affect eligibility?
 - ✓ What documents are mandatory?
-

Hostel

- ✓ What is hostel fee?
 - ✓ Is mess included?
 - ✓ Safety arrangements?
-

Academics

- ✓ What branch-wise placement support exists?
-

7.12 Fees — What Is Known vs What Needs Verification

Verified Information

The institution maintains:

- Fee payment process

- Refund policies
 - Admission payment systems
-

Not Yet Verified (Must Confirm Directly)

Students should directly verify:

B.Tech Fee

(by branch)

MBA Fee

M.Tech Fee

Hostel Fee

Transport Fee

Examination Charges

Miscellaneous Charges

Important Advice

Never rely only on:

- ✗ WhatsApp forwards
- ✗ Third-party websites
- ✗ Old student screenshots

because:

Fees can change every academic year.

Always ask for:

Official written fee structure

before payment.

8. Hostel, Campus Life & Daily Student Experience (Detailed)

For many students, especially first-time hostellers, this becomes a major concern.

Students often ask:

“How is hostel life?”

“Is girls hostel safe?”

“Should I stay in hostel or travel daily?”

“Will I get good study environment?”

8.1 Hostel Facilities at SEAT

SEAT reportedly provides:

Separate Hostels for Boys & Girls

Boys Hostel

Capacity

Approximately:

300 students

Location

Reportedly:

Inside campus

Benefits

- Easier class access
 - Less travel time
 - Better convenience
-

Girls Hostel

Capacity

Approximately:

246 students

Location

Reportedly:

Near/outside campus

Safety Support

The institution reports:

Dedicated wardens and supervision arrangements.

Common Facilities to Verify

Students should physically inspect:

- ✓ Room sharing system
 - ✓ Washrooms
 - ✓ Water supply
 - ✓ Electricity backup
 - ✓ Cleanliness
 - ✓ Study atmosphere
-

Important Parent Advice

Before paying hostel fee:

Visit personally if possible.

Do not rely only on:

Photos or brochures.

Ask:

- ✓ Number of students per room?
 - ✓ Wi-Fi availability?
 - ✓ Study timings?
 - ✓ Curfew rules?
 - ✓ Medical support?
 - ✓ Security arrangements?
-

Mess & Food

Food arrangements are generally part of hostel experience.

Students should verify:

- ✓ Veg/non-veg availability
 - ✓ Food quality
 - ✓ Meal timings
 - ✓ Hygiene
-

Laundry & Daily Needs

Verify:

- ✓ Laundry availability
 - ✓ Nearby stores
 - ✓ Drinking water quality
-

Hostel Reality Check

Hostel life teaches:

- Independence
- Discipline
- Time management
- Social interaction

But students must adapt to:

- Shared rooms
- Limited privacy
- Hostel rules

8.2 Day Scholar vs Hostel — Which Is Better?

One of the biggest decisions for students and parents is:

Should I stay in hostel or travel daily?

There is no single correct answer.

The best choice depends on:

- Distance from home
 - Financial affordability
 - Travel convenience
 - Student discipline
 - Study habits
-

Option 1: Day Scholar (Daily Travel)

A **day scholar** travels from home to college every day.

Suitable For Students Who

- ✓ Live reasonably near Tirupati/college area
 - ✓ Have reliable transport access
 - ✓ Prefer staying with family
 - ✓ Want lower living expenses
-

Advantages of Being a Day Scholar

1. Family Support

Students stay with:

- Parents
- Family members

This often helps:

- Emotional support
- Better food
- Financial savings

Especially useful for:

First-year students

who may need adjustment time.

2. Lower Expenses

Students may save:

- Hostel fee
 - Mess fee
 - Laundry expenses
-

3. Better Comfort

Students may enjoy:

- Home food
 - Familiar environment
 - Better privacy
-

Challenges of Being a Day Scholar

1. Travel Time

Long daily travel can become tiring.

Example:

2–3 hours daily travel

may reduce:

- Study time
 - Energy
 - Focus
-

2. Missing Campus Activities

Students may miss:

- Evening events
 - Workshops
 - Club activities
 - Group study sessions
-

3. Less Peer Interaction

Hostel students sometimes build stronger peer networks because they spend more time together.

Option 2: Hostel Student

Hostel life is often suitable for:

- ✓ Students coming from distant locations
 - ✓ Students wanting campus immersion
 - ✓ Students wanting peer learning environment
-

Advantages of Hostel Life

1. More Academic Access

Students remain closer to:

- Faculty
 - Library
 - Labs
 - Friends
 - Study groups
-

2. Better Peer Learning

Students learn from:

- Seniors
- Friends
- Group discussions

This becomes especially useful in:

CSE / AI branches

where peer collaboration helps.

3. Time Saving

No long commuting.

Students may use time for:

- Coding practice
 - Placements
 - Clubs
 - Projects
-

Challenges of Hostel Life

1. Shared Living

Students must adapt to:

- Shared rooms
 - Different habits
 - Less privacy
-

2. Homesickness

Common in first year.

Usually improves over time.

3. Food Adjustment

Students sometimes need time to adjust to hostel food.

Practical Recommendation

Choose Day Scholar If:

- ✓ Home is nearby
 - ✓ Travel manageable
 - ✓ Family environment supports study
-

Choose Hostel If:

- ✓ Long travel exists
 - ✓ Student wants stronger academic involvement
 - ✓ Better time management needed
-

8.3 Transport & Bus Facilities

SEAT reportedly operates:

Approximately 9 buses

Coverage reportedly includes:

Tirupati

Approximately **8 buses**

Srikalahasti

Approximately **1 bus**

Why Transport Matters

Before admission, students should verify:

- ✓ Bus route availability
 - ✓ Pickup location
 - ✓ Bus timings
 - ✓ Annual transport charges
-

Questions Students Should Ask

“Does the bus come near my village/town?”

“What time does bus leave?”

“Is there return transport after workshops/events?”

Important Reality

Transport convenience significantly affects:

Attendance

Energy levels

Time available for self-study

8.4 Daily Academic Life at SEAT

Students often ask:

“What does a normal day in engineering college look like?”

While schedules vary, a typical student experience may include:

Morning Sessions

Students attend:

Theory Classes

Subjects may include:

For CSE:

- Programming
- DBMS
- OS
- Networks

For ECE:

- Electronics
- Communication

For EEE:

- Electrical systems

etc.

Practical/Lab Sessions

Engineering education is not only theory.

Students attend:

Laboratories

Examples:

- Programming labs
- Electronics labs
- Mechanical workshops

Purpose:

To gain practical exposure.

Internal Assessments

Students usually face:

Mid/Internal Exams

through semester.

These matter because:

Internal marks may contribute to final results.

Semester Exams

At end of semester:

Students take:

External Examinations

managed through institutional examination system.

Study Reality for Students

Important truth:

Students who rely only on:

Classroom teaching

often struggle in placements.

Successful students usually do:

- ✓ Self-learning
- ✓ Projects
- ✓ Practice coding/problem solving
- ✓ Aptitude preparation

especially from:

2nd year onward

Attendance

Exact attendance policy should be verified.

However:

Engineering colleges generally maintain attendance requirements for:

- Exam eligibility
- Academic continuity

Students should verify:

Minimum attendance requirement

during admission.

8.5 Student Clubs & Campus Activities

College life is not only academics.

SEAT reportedly provides various clubs for student development.

Technical Clubs

Math Club

Helps improve:

- Problem solving
 - Analytical thinking
-

Physics Club

Supports:

- Applied science learning
-

Tech Delight Club

Technical exposure and activities.

Energy Club

Awareness related to energy and technical discussions.

Professional Student Chapters

These help students become industry-ready.

IEEE Student Branch

Institute of Electrical and Electronics Engineers

Benefits:

- Workshops

- Technical exposure
 - Networking
-

ACM Student Chapter

Association for Computing Machinery

Especially useful for:

- Programming students
 - Computer science students
-

CSI Student Chapter

Computer Society of India

Provides:

- Technical activities
 - Computing exposure
-

SAE Student Chapter

Society of Automotive Engineers

Useful for:

- Mechanical students
 - Automobile enthusiasts
-

Creative Clubs

Fine Arts Club

Supports:

- Creativity
 - Cultural participation
-

Eco Club

Supports:

- Environmental awareness
 - Sustainability activities
-

NSS Activities

National Service Scheme

Students may participate in:

- Community service
- Social awareness
- Volunteering

Benefits:

- Personality development
 - Leadership skills
-

8.6 Student Safety & Welfare Systems

Parents often ask:

“Is student safety taken seriously?”

SEAT reportedly maintains multiple student welfare systems.

Anti-Ragging Cell

Purpose:

Prevent ragging and maintain safe campus environment.

Students facing issues may report concerns.

Anti-Drug Cell

Purpose:

- Awareness
 - Prevention
-

Student Grievances Redressal Cell

Purpose:

Students may raise concerns regarding:

- Academics
 - Facilities
 - Student issues
-

Women Empowerment Committee

Focus:

- Women's welfare
 - Awareness
 - Support
-

Gender Equity Cell

Supports:

Equal and respectful campus environment.

Parent Advice

Ask during campus visit:

- ✓ How grievances are handled?
- ✓ Whom should student contact in emergency?
- ✓ Hostel safety process?
- ✓ Medical support availability?

9. Placements & Career Development (Very Detailed)

This section is one of the **most important for newly joining students and parents**.

Students often ask:

“Will I get placement if I join this college?”

Parents ask:

“What is the placement percentage?”

But the better question is:

“What kind of opportunities exist, and what must the student do to actually get placed?”

This section explains placements realistically — **without hype and without fear**.

9.1 Understanding Placements Correctly

Before discussing SEAT specifically, students must understand:

Important Truth

No engineering college can **guarantee placement**.

A college can only provide:

- ✓ Opportunities
- ✓ Recruiters
- ✓ Training
- ✓ Placement support

But:

Student preparation ultimately matters the most.

Placement Depends on Three Things

1. College Support

Examples:

- Placement training
 - Recruiter access
 - Industry interaction
-

2. Branch Opportunities

Example:

Software hiring generally creates more openings for:

- CSE
- AI
- AI&ML
- Data Science
- ECE

compared to some core branches.

3. Student Effort (Most Important)

Students who get placed usually build:

- ✓ Skills
 - ✓ Projects
 - ✓ Communication ability
 - ✓ Interview confidence
 - ✓ Aptitude preparation
-

Common Misunderstanding

Wrong Thinking

“If I join CSE, placement is guaranteed.”

Reality:

Even in CSE:

Students without skills may struggle.

9.2 Training & Placement Cell (TAP Cell) at SEAT

SEAT reportedly operates a:

Training & Placement (TAP) Cell

Its purpose is to improve:

Student employability and career readiness.

What TAP Cell Generally Does

1. Placement Drives

Coordinates:

- On-campus recruitment
- Off-campus recruitment

for students.

2. Placement Training

Students reportedly receive coaching in:

Aptitude

Topics may include:

- Quantitative aptitude
 - Logical reasoning
 - Analytical ability
-

Communication Skills

Focus on:

- Speaking confidence
 - Interview communication
 - Professional behavior
-

Soft Skills

Includes:

- Personality development
 - Team interaction
 - Workplace readiness
-

Interview Preparation

Students may receive:

- Interview guidance
 - Mock interview support
 - Placement orientation
-

Training Duration

Available information suggests:

100+ hours of training

through placement preparation initiatives.

Training Partners

Reported collaborations include:

Career Launcher

Supports:

- Aptitude
- Reasoning
- Soft skills

Barklay Group of Solutions

Reportedly provides:

- Communication training
- Personality development

with significant training support for senior students.

9.3 How Placement Process Actually Works

Many students imagine:

Company comes → interview → job

Reality is more structured.

Typical placement process includes multiple rounds.

Step 1: Eligibility Filtering

Companies first check eligibility.

Criteria may include:

Academic Percentage

Sometimes:

- 60%+
- No active backlogs

(Company-specific)

Branch Eligibility

Some companies allow:

All branches.

Some prefer:

- CSE
 - IT
 - ECE
-

Backlog Restrictions

Some companies avoid:

Students with active backlogs.

Step 2: Aptitude Round

Students solve:

Quantitative Questions

Examples:

- Percentages
 - Ratios
 - Time & work
-

Logical Reasoning

Examples:

- Patterns
 - Sequences
 - Puzzles
-

Verbal Ability

Examples:

- English
- Reading comprehension

Step 3: Technical Round

Depends on branch.

CSE Students

Often asked:

- Programming
- DBMS
- OOP
- OS
- Networks
- Projects

ECE Students

Questions may involve:

- Electronics
- Communication
- Embedded concepts

Mechanical/Civil

May involve:

Core technical basics.

Step 4: Coding Test (Mostly for Software Roles)

Students may solve:

Programming problems.

Popular areas:

- Arrays
- Strings
- Problem solving

Step 5: HR Round

Focus:

- Communication
- Confidence
- Attitude

Common questions:

“Tell me about yourself”

“Why should we hire you?”

“Explain your project”

9.4 Recruiters at SEAT

Reported recruiters include:

Tata Consultancy Services

Infosys

Capgemini

Wipro

IBM

Accenture

HCL Technologies

Tech Mahindra

Mindtree

Bosch

Toyota

Additional companies reportedly include:

- OPPO
 - Hinduja Global Solutions
 - Experis IT
 - Avenue IT Solutions
 - J-Spiders / Q-Spiders
-

Important Interpretation

Students should understand:

A recruiter visiting college does NOT mean everyone gets selected.

Selection depends on:

- Eligibility
 - Skills
 - Performance
-

9.5 Highest Package vs Median Package (Very Important)

This is where many parents misunderstand placement statistics.

Highest Package

Reported highest package:

₹30 LPA

(for a reported CSE student batch)

Important Reality

Highest package usually means:

One exceptional student.

It should NOT be interpreted as:

“Everyone gets high salary.”

Median Package (More Important)

Reported median salary:

UG (B.Tech)

₹3.75 LPA

PG (MBA/M.Tech)

₹3.15 LPA

Why Median Matters More

Median tells you:

What a typical student might realistically receive.

For example:

If salaries are:

3, 3.5, 4, 4, 30

Average becomes misleading.

Median gives more realistic expectation.

Practical Student Expectation

Students should think:

Strong skill + preparation

→ Higher opportunities

Minimal preparation

→ Lower outcomes

9.6 Department-wise Placement Reality

CSE / AI / AI&ML / Data Science

More opportunities exist because:

Software industry hires in larger numbers.

Common roles:

- Software Engineer
 - QA
 - Analyst
 - Developer
-

Reality Check

Students still need:

- ✓ Coding practice
 - ✓ Projects
 - ✓ DSA
 - ✓ Communication
-

ECE

Strong advantage:

Core + software flexibility

Many ECE students move to:

- IT jobs
 - Embedded systems
 - Software
-

EEE

Placement opportunities exist but students often need:

Additional preparation

especially if targeting software roles.

Government jobs remain attractive path.

Mechanical Engineering

Reality:

Core placements may be more limited.

Students often choose:

- GATE
- Higher studies
- CAD specialization
- IT transition

Civil Engineering

Good for:

- Construction sector
- Government engineering pathways

Students interested in field work may do well.

9.7 Internships (Very Important)

Students underestimate internships.

Internships help:

- ✓ Resume building
- ✓ Practical experience
- ✓ Industry exposure
- ✓ Better placement performance

Common Mistake

Students wait until:

Final year

Too late.

Better Approach

2nd Year

Start learning skills.

3rd Year

Try internship.

Final Year

Placement preparation should already be strong.

9.8 Placement Preparation Timeline (Highly Recommended)

1st Year

Focus:

- Communication
 - Basic coding
 - Discipline
-

2nd Year

Start:

- Projects
 - DSA basics
 - Technical learning
-

3rd Year

Critical year.

Focus:

- Aptitude
 - Resume
 - Mock interviews
 - Internships
-

Final Year

Focus:

- Placement drives
 - Interview readiness
 - Company-specific preparation
-

9.9 Biggest Placement Mistakes Students Make

- ✗ Waiting until final year
 - ✗ Depending only on classroom teaching
 - ✗ Ignoring coding practice
 - ✗ No projects
 - ✗ Weak communication
 - ✗ Not learning aptitude
 - ✗ Believing “college alone will place me”
-

9.10 Honest Guidance for Students & Parents

Choose college based on:

- ✓ Branch fit
- ✓ Placement support
- ✓ Student effort potential

Avoid thinking:

“Highest package = guaranteed outcome.”

Instead ask:

“Will my child realistically use the opportunities available?”

For many students:

Consistent preparation matters more than college brand alone.

10. Academic Life, Exam Branch & Evaluation System (Very Detailed)

This section is extremely important because many newly joining students fear:

“Will engineering be too difficult?”

“What if I fail?”

“How do exams actually work?”

“What is backlog?”

“How do I avoid academic problems?”

The purpose of this section is to explain:

How academics realistically work at SEAT and engineering colleges in general.

10.1 Understanding Academic Life at SEAT

Engineering education is very different from school/intermediate.

In Intermediate:

Students mostly:

- Memorize
- Write exams

In Engineering:

Students are expected to:

- ✓ Understand concepts
- ✓ Apply concepts
- ✓ Perform practical work
- ✓ Build technical skills
- ✓ Learn independently

This adjustment is often the biggest challenge for first-year students.

Academic Structure

SEAT reportedly follows:

Semester-based academic system

This means:

The academic year is divided into:

Semester 1

-

Semester 2

Each semester includes:

- Theory subjects
- Laboratory sessions
- Internal assessments

- End-semester examinations
-

Types of Learning Students Experience

Engineering is usually a combination of:

1. Theory Learning

Classroom teaching.

2. Practical Learning

Lab sessions.

3. Self Learning

Very important.

Students often need to learn independently through:

- Practice
- Online learning
- Peer discussions

especially in branches like:

- CSE
 - AI
 - ECE
-

10.2 Understanding Academic Regulations (R25, etc.)

Students often hear terms like:

R23
R25
Regulation

and become confused.

What Is a Regulation?

A regulation defines:

The academic rules applicable to your batch.

It determines:

Syllabus

Which subjects you study.

Credits

Weightage of courses.

Evaluation Method

How marks are calculated.

Passing Rules

Minimum marks required.

Examination Pattern

Internal vs external evaluation.

Example

Suppose:

You join in a year under:

R25 Regulation

Then:

Your syllabus and exam pattern may differ from seniors under:

R23 Regulation

This is normal.

Why Regulations Change

Universities revise curriculum to include:

- New technologies
- Industry requirements
- Better academic structure

For example:

AI and Data Science subjects may increase over time.

Student Advice

Always refer to:

Your regulation-specific syllabus

Do not blindly follow:

Senior notes only.

because syllabus may differ.

10.3 What a Typical Academic Day Looks Like

A normal engineering day usually includes:

Theory Classes

Students attend classroom lectures.

Examples:

CSE

- Programming
- DBMS
- Operating Systems

ECE

- Electronics
- Communication systems

Mechanical

- Thermodynamics
 - Manufacturing
-

Laboratory Sessions

Engineering is practical-oriented.

Students spend time in:

Labs

Examples:

CSE Labs

- Programming lab
- DBMS lab

ECE Labs

- Circuit labs
- Communication labs

Mechanical

- Workshop practice
-

Assignments

Faculty may assign:

- Homework
 - Practical work
 - Mini tasks
-

Record Work

Many lab subjects require:

Lab Record Books

Students maintain:

- Experiment details
 - Observations
 - Outputs
-

Important Reality

Students ignoring lab work often lose:

Internal marks

which later creates academic problems.

10.4 Internal Exams (Very Important)

Many first-year students ignore internals.

This becomes a mistake.

What Are Internal Exams?

Internal exams happen:

During semester
before final exams.

Also called:

Mid Exams

or

Internal Assessment

Why Internals Matter

Internal performance may contribute to:

Final subject marks

Depending on regulation.

What Internals Usually Test

- Concepts taught in class
 - Problem-solving ability
 - Subject understanding
-

Practical Advice

Do NOT think:

“I’ll study only before semester exam.”

Students who prepare for internals generally perform much better later.

Smart Strategy

After every class:

Spend:

30–45 minutes revision daily

instead of:

Last-minute exam stress.

10.5 Laboratory Evaluation

Lab subjects are important.

Evaluation may involve:

Experiment Performance

How you execute tasks.

Viva (Oral Questions)

Faculty may ask:

“Explain your experiment.”

Record Submission

Students may need:

Properly maintained lab records.

Internal Lab Marks

Lab performance may affect:

Overall result

Common Student Mistake

Students copy:

Lab records at last minute.

This often hurts understanding.

10.6 Semester / External Examinations

At end of semester:

Students take:

External Exams

These are major examinations.

Purpose

To evaluate:

Overall semester learning.

Hall Ticket Eligibility

Students generally need:

- ✓ Required attendance
- ✓ Fee completion
- ✓ Academic eligibility

Students should verify exact requirements.

Exam Preparation Reality

Many students fail because:

Wrong Method

“Study everything one day before exam.”

Engineering subjects require:

Concept understanding.

Better Strategy

Daily Revision

-

Previous questions

-

Concept clarity

10.7 What Is a Backlog?

Many students panic about this.

Definition

A backlog means:

Failing a subject and needing to clear it later.

Example:

Student fails:

Mathematics

Then:

Student may write supplementary exam later.

Important Reality

Backlogs are common in engineering.

Especially in:

First year

due to adjustment issues.

But Students Should Avoid Them

Too many backlogs can affect:

Placements

Some companies ask for:

No active backlogs.

Common Difficult Subjects

Usually include:

- Mathematics
- Programming
- Core technical subjects

(depending on branch)

10.8 Supplementary Exams

Students with failed subjects may get:

Supplementary Examination Opportunity

Purpose:

Clear failed subject.

Advice

Clear backlog quickly.

Do not postpone repeatedly.

because:

Multiple backlogs increase pressure.

10.9 Recounting (RC) & Revaluation (RV)

SEAT reportedly supports:

RC — Recounting

Meaning:

Marks are recalculated.

Useful when student believes:

Totaling mistake happened.

RV — Revaluation

Meaning:

Answer script is rechecked.

Useful when:

Student feels:

Marks are unusually low.

When Students Should Apply

Consider if:

- ✓ Student expected much better performance
- ✓ Result appears abnormal

Avoid applying emotionally after every exam.

10.10 Attendance & Academic Discipline

Students often underestimate attendance.

Why Attendance Matters

Attendance may affect:

Hall Ticket Eligibility

Internal marks

Academic standing

Common Mistake

Students think:

“College attendance doesn’t matter.”

Reality:

Poor attendance can create:

- Exam issues
 - Internal mark loss
 - Academic stress
-

Parent Advice

Parents should regularly ask:

“Are you attending classes?”

not only:

“What marks did you get?”

10.11 Why Students Fail Engineering Subjects

Most failures happen due to:

Mistake 1: Last-Minute Study

Engineering is difficult to cram.

Mistake 2: Ignoring Internals

Students lose easy marks.

Mistake 3: Weak Fundamentals

Example:

Weak math → difficulty in engineering subjects.

Mistake 4: Too Much Mobile/Distracted

Very common in first year.

Mistake 5: Fear of Asking Doubts

Students hesitate.

This becomes dangerous academically.

10.12 Smart Study Strategy for Engineering Students

First Year

Focus on:

- ✓ Basics
- ✓ Mathematics
- ✓ Communication
- ✓ Discipline

Do NOT ignore first year.

It builds foundation.

Second Year

Start:

- ✓ Technical depth
 - ✓ Coding/projects
 - ✓ Branch understanding
-

Third Year (Critical)

Focus:

- ✓ Internships
 - ✓ Placement preparation
 - ✓ Aptitude
-

Final Year

Focus:

- ✓ Placements
 - ✓ Projects
 - ✓ Career readiness
-

Final Academic Advice

Engineering success is usually:

Consistency + discipline

not:

“Last-minute intelligence.”

Students who study:

1–2 hours consistently daily

often outperform students who panic before exams.

11. Facilities, Resources, Labs & Infrastructure (Strictly Factual)

This section contains **only factual details explicitly available in the provided material**.

11.1 Library Facilities

SEAT reportedly maintains a **Central Library** for students.

Library Resources

The library reportedly contains:

- **30,000+ books**
 - **60+ online journals**
 - **56+ Indian print journals**
-

Library Infrastructure

Reported facilities include:

- Seating capacity for approximately **500 students**
 - **Digital Library section**
 - **E-Learn @ Library portal**
 - **Online Public Access Catalogue (OPAC)**
 - **Barcoded library system**
-

Digital Learning Resources

The library reportedly provides access to:

- E-books
 - CDs
 - DVDs
 - Audio-visual learning aids
-

11.2 Laboratories

The institution reports that:

Specialized laboratories are available for departments.

The provided material indicates:

- Department-specific laboratories
- Practical learning support

However:

A department-wise list of laboratories was not available in the provided information.

Mentioned Specialized Labs

The following labs/resources were explicitly mentioned:

Microsoft Innovation Lab

The institution mentions the presence of a:

Microsoft Innovation Lab

However:

Specific activities, infrastructure details, software availability, or student usage information were not available in the provided material.

Antique Lab

The institution also mentions:

Antique Lab

However:

Detailed purpose or operational information was not available in the provided material.

11.3 ICT & Media Facilities

The institution reportedly provides:

ICT Facilities

(Information and Communication Technology facilities)

and

Media Center

However:

Detailed descriptions of systems, equipment, or student access procedures were not available in the provided material.

11.4 Research & Academic Support Resources

The following academic support systems were explicitly mentioned.

Research & Development (R&D) Cell

The institution reports an:

R&D Cell

Purpose stated in the material:

- Research support
- Academic development

However:

Specific research programs, funded projects, or department-wise activities were not provided.

NPTEL Local Chapter

The institution reports functioning as an:

NPTEL Local Chapter

However:

Specific courses, participation statistics, or certification details were not available in the provided material.

Centre of Excellence

The institution mentions a:

Centre of Excellence

However:

Its specialization areas or operational details were not available in the provided information.

11.5 Auditorium

The institution reports an auditorium named:

Sir Mokshagundam Visvesvaraya Sabhasthali

Reported details include:

- Constructed around **2013**
- Seating capacity reported between **600–1000 students**

Reported usage includes:

- Seminars
- Symposiums
- Department functions
- Cultural activities

The auditorium reportedly includes:

Audio-visual facilities

11.6 Sports & Physical Facilities

The institution reports facilities for:

Outdoor Games

Including:

- Cricket
 - Football
 - Tennis
 - Volleyball
-

Indoor Games

The institution reports:

Indoor games facilities

However:

Specific games and infrastructure details were not listed in the provided material.

Yoga Centre

The institution reports a:

Yoga Centre

Purpose mentioned:

- Physical well-being
- Mental well-being

No further operational details were provided.

Health Centre

The institution reports a:

Health Centre / Medical Room

Purpose mentioned:

Student health and emergency support.

Further operational details were not available.

11.7 Hostel Infrastructure

The institution reports:

Boys Hostel

- Approximate capacity: **300 students**
 - Reportedly located **within campus**
 - Warden support mentioned
-

Girls Hostel

- Approximate capacity: **246 students**
 - Reportedly located **outside campus**
 - Warden support mentioned
-

The institution reports an:

Eco Club

No detailed operational information was available.

13.8 National Service Scheme (NSS)

The institution reports:

National Service Scheme (NSS)

No program-level activity details were available in the provided material.

14. Exam Branch (Strictly Factual)

The institution reports a dedicated:

Exam Branch

14.1 Functions Mentioned

The provided material explicitly mentions:

Branch Details

Standard Operating Procedure (SOP)

Exam Code of Conduct

IT Integration in Examination Process

Exam Notices

Time Tables

University Toppers

Fee Payment (Exam-related)

14.2 Examination Notifications Mentioned in Material

The material explicitly referenced:

May 2026 Notifications

Related to:

B.Tech I-Sem (R25) Supplementary External Examinations

and

B.Tech II-Sem (R25) Regular External Examinations

March 17, 2026 Results

The material mentions declaration of results for:

- B.Tech
- M.Tech
- MBA

under:

I-Sem (R25) External Examinations

March 18, 2026 Notifications

The institution reportedly issued:

RC (Recounting)

and

RV (Revaluation)

notifications.

Reported Student Access

The material mentions:

Results access

and

Login/grievance-related access

through institutional website navigation.

However:

Detailed examination workflow and academic rules were not available in the provided material.

15. Contact Information (Strictly Factual)

Main Institutional Contact

Address

Siddhartha Educational Academy Group of Institutions

Gollapalli Road, Chintagunta Village

Near C. Gollapalli, Tirupati (Rural),

Andhra Pradesh – **517505**
